DETAILED ACTION

Claim Rejections - 35 USC § 103

1. Claims 1-5, 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cetrelli in view of Applicant's admitted prior art, hereinafter, AAPA as discussed in paragraph 2 of the last office action.
2. Applicant's arguments filed 11/27/2002 have been fully considered but they are not persuasive.

In response to applicant's argument regarding the tear propagation, the examiner first notes that element 7 for Cetrelli reads on the vent apertures as claimed. Since elements 7 provide good ventilation (col 4 lines 35+), elements 7 read on vent apertures. Since these vent apertures are oriented in a direction that is not parallel to the direction of perforation, these apertures will not tear easily like traditional tear lines wherein the tear line is a collinear line segment oriented in the direction of perforation. (p. 1 lines 6 of applicant's specification).

In response to providing ventilation for the interior of the package, the examiner first notes that Applicant's admitted prior art discloses that air slits are known to keep the contents of the bag from being forced out through the slits such as a bag of flour (p. 2 lines 13+). Furthermore, the actual area that is to be ventilated is a matter of the user's preference. Therefore, the examiner maintains that Applicant's admitted prior art reads on ventilating the interior of a package and the combination of Cetrelli in view of AAPA is deemed proper.

In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
